Noida
(Senior Software Engineer)

ABOUT

Senior Software Engineer with 6+ years of experience in backend development using PHP (Laravel) and Node.js, along with hands-on experience in frontend development for admin panels and websites using ReactJS. Skilled in designing and integrating scalable HRMS, payroll, and attendance systems. Proficient in REST APIs, MySQL, Docker, and cross-functional team collaboration, with strong knowledge of Agile methodologies.

WORK EXPERIENCE

Senior Software Engineer | Nead IT Solutions Pvt. Ltd. - Noida (01/2024 - 08/2025)

- Leading end-to-end development of a scalable **HRMS platform**, including payroll, leave, and attendance modules using **Laravel**, **MySQL**, and **React**.
- Designed and implemented **secure REST APIs** with **Laravel Passport**, enabling OAuth2 authentication across user roles.
- Architected a robust **role-based access control system** using **Spatie Permissions**, supporting fine-grained user-level restrictions.
- Coordinated closely with frontend teams to integrate backend services, ensuring consistent user experience.
- Optimized database queries and implemented caching, reducing page load times by **30%**.
- Used **Docker** for local development and deployments to maintain consistent environments.
- **Agile contribution**: "Participated in 2-week sprint cycles, daily standups, and code reviews.

Software Engineer | e2logy technology pvt. Ltd. - Noida (09/2023 - 12/2023)

- Developed backend features for a **real estate web platform**, enabling users to **search, rent, or purchase** properties such as **villas, apartments, flats, and rooms**, based on occupancy and requirements.
- Built and consumed **RESTful APIs** for property listings, filters, and booking functionalities; supported scalability and user personalization.
- Integrated **Stripe payment gateway** to handle secure online transactions for bookings and purchases.
- Worked with **Laravel**, **SQLYog**, **Git**, and **Postman** for backend and version control tasks.

Software Engineer| Agicent Technology Pvt. Ltd. - Noida (09/2021 - 08/2023)

- Led **frontend and backend development** across multiple client-based projects using **Laravel, Node.js, Express.js, React.js, PHP**, and **SQL databases**.
- Built and maintained **RESTful APIs** and **admin panels** for real-world applications, including:
  - **Food Delivery App** – Developed APIs for restaurant, valet, and customer modules.
  - **Real Estate App** – Enabled user roles for **buyers, sellers, and vendors**, with advanced property listing features.
  - **Social Media Platform** – Worked on user engagement, media upload, and feed logic.
  - **Car Parking Website**, **Pharmacy App**, and **Job Portal (Naukri-style)** with complex user flows and data management.
- Collaborated with cross-functional teams in an **Agile/Scrum environment**, serving clients across **North and South America**.
- Practiced **clean code principles**, integrated third-party services, and optimized performance across platforms.

Web Developer Intern | Aoelogic Technology- Noida | (09/2020 - 08/2021)

- Assisted in **designing and developing web modules** as part of a government-backed project aimed at **identifying and tracking polluting vehicles**.
- Contributed to a system that **scanned vehicle details**, verified emission compliance, and generated **digital challans** for violations.
- Integrated **user authentication** and developed frontend flows where users could **log in and pay fines online**.
- Gained hands-on experience with **web technologies** and improved coding practices through **mentorship and real-time project exposure**.

.Net Developer | Keshav Mangalam Impex Pvt. Ltd. - Noida | (07/2019 - 08/2020)

- Worked onsite for **Singapore Government's Accounting and Corporate Regulatory Authority (ACRA)** for 2 months on a high-security compliance system.
- Designed and developed a **custom CRM solution in .NET** for managing the company registration lifecycle and associated compliance processes.
- Contributed to the automation of **GST number allocation** after validating company offenses and regulatory adherence.
- Assisted in implementing logic for **flagging and reviewing serious offenses** committed by entities or individuals, which could result in **company closure actions**.
- Ensured **data integrity, security compliance**, and supported workflows related to corporate governance and regulatory enforcement.

PROFESSIONAL PROJECTS

HRMS (Huma n Resources Management System) (01/2024 - 08/2025)

Tech Stack: Laravel, Node.js, React, MySQL, Docker, Passport, Spatie

- Developed a full-featured enterprise-grade HRMS for multi-company environments.
- Built dynamic modules for Employee Management, Attendance, Payroll, Asset Tracking, and Leave Management.
- Designed advanced shift & leave logic including CO, sandwich, partial day, and week-off rules.
- Implemented secure role-based access using **Spatie** and Passport-authenticated APIs.
- Created ESS and Admin Dashboards, SMTP multi-email management, and notification workflows.
- Asset Management: Company-issued assets tracking and assignment.
- Payroll Processing: With statutory deductions (PF, ESIC, PT, LWF), CTC builder, bonus, gratuity, overtime, and full salary generation.
- Employee Lifecycle: Includes onboarding, full & final settlement (FNF), and exit management.
- Role-Based Admin Panel: Built with Spatie permissions; Passport-secured API for login.
- Notifications & Workflows: Announcements, events, news, and multi-level approval flows.
- Dashboard Views: Personalized views for Admin and ESS (Employee Self Service).
- SMTP Settings: Manage multiple email credentials via frontend UI.
- Basic understanding of TDS, loans, and reimbursements is also incorporated into the architecture.

Orion House (08/2023 - 12/2023)

Tech Stack: PHP, MySQL

- Developed a property listing platform enabling users to **buy or rent villas, apartments, flats, or rooms**.
- Integrated **Stripe** for secure online payments.
- Built user-to-owner communication modules for real-time property inquiries.

Essel (04/2023 - 08/2023)

Tech Stack: PHP

- Built a platform for **construction workers** to search jobs, generate resumes, and connect with employers.

- Designed profile-based resume generation and job notifications.

Swap A Spot (04/2023 - 08/2023)
Tech Stack: Laravel, Stripe, Socket.io
- Developed APIs to book and manage parking spots.
- Enabled **real-time communication** using **Socket.io** between users and parking spot owners.
- Integrated **Stripe** for payment processing.

BeachGrub (09/2021 - 08/2023)
Tech Stack: Laravel, MySQL
- Designed and built Admin Panel and API to manage **restaurant, valet, and customer data**.
- It's a CRM to handle data of Restaurant, Valet and Customer.

Patriot Nation (01/2022 - 12/2022)
Tech Stack: ReactJS, Node.js, SQL
- Created a US-based **social media platform** similar to Facebook/Instagram.
- Developed web app UI using ReactJS and backend APIs using Node.js.

EDUCATION

Raj Kumar Goel Institute of Technology & Management
Bachelor of Technology (2015-2019) |
Computer Science & Engineering| With 77% |

Gyan Deep Sr. Sec. Public School
Class 12th | (2014) |
72% |

Gyan Deep Sr. Sec. Public School
Class 10th | (2012)|
CGPA: 9.0 |

SKILLS

****Programming Languages:** PHP, JavaScript, SQL, C**

****Frontend Technologies:** HTML, CSS, JavaScript, ReactJS**

****Backend Frameworks:** Laravel, Node.js, Express.js**
